Six-point paper snowflake

Print at 100%. Cut out the circle first. Cut away the shaded areas only after folding.

Fold and cut

1. Fold the lower half behind the upper half. Keep the marked wedge face up on the right.
2. Fold the left third behind the middle third. Fold that doubled third behind the right third.
3. Fold the upper half of the remaining 60-degree fan behind the marked wedge.
4. Cut through all twelve layers along the dark cut lines. Remove only the shaded scraps.
5. Unfold in reverse order. The six long tips should sit in three opposite pairs.

25 mm scale check
