Paper weaving patterns

Print at actual size. Check the scale bar before cutting.

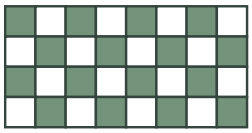

Slit mat

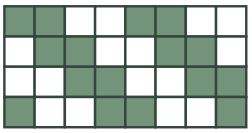

Cut eight strips

Plain weave

Two-over, two-under twill

Shaded = horizontal strip on top. Start each row at the left. Repeat down the mat.

1. Cut out the mat. Fold it across its middle and cut the seven solid slits through the folded edge. Leave the 10 mm borders intact.
2. Trace the strip block onto contrasting paper. Cut eight 10 x 100 mm strips.
3. Weave each strip from left to right. For a checkerboard alternate over and under, reversing the starting position on the next row.
4. For twill, go over two and under two. Shift the repeat one lane right per row. Centre the strips and secure just their ends.
