Pop-up card template

Print at actual size. Check the scale bar before cutting.

1. Cut the 140 x 120 mm rectangle and fold it in half across the dashed centre line.
2. From the folded edge, cut both solid slits through both layers. Stop 20 mm from the fold.
3. Open the insert halfway. Push the panel into the card and crease its three hinges so it forms a step.
4. Close the card to check that the step folds flat. Glue the insert into an outer cover, leaving the moving step free.
